LED

LEDs meaning – MyChron Expansion

Question:
How can I interpret my MyChron Expansion module LED behavior?

Answer:
MyChron Expansion LED shows two behaviors, described below:

N.B.: MyChron Expansion LED can be green or red; their behavior is the same for both product versions.

- **Red/green LED slow blinking:**
  Channel Expansion is correctly powered up, but it is not recognized by the MyChron to whom it is connected.
- **Red/green LED continuously:**
  Channel Expansion is correctly powered up and recognized by the MyChron.
